## High-Flow Whole House Filtration System

This whole-house filtration system provides economical, high flow solutions for sediment, taste and odor removal.

### AQUA FLO® High-Flow Whole House Filtration System

#### Features:

- ◆ High-Flow Dual Filtration System
- ◆ Up to 70,000 Gallons of great tasting water
- ◆ Flow rates up to 6 gpm
- ◆ Large 20" Filters for long lasting performance
- ◆ Dimensions: 8" deep, 16 1/4" wide, 27 1/2" high
- ◆ Weight: 21 lb.s (9.5 kg.)
- ◆ Inlet/outlet pressure gauges indicate when filter replacements are required
- ◆ For municipal water supplies.

#### High-Flow Systems:

**160197 High-Flow Dual Stage 20BB SED, Carbon, 3/4" In/Out**

**160198 High-Flow Dual Stage 20BB SED, Carbon, 1" In/Out**

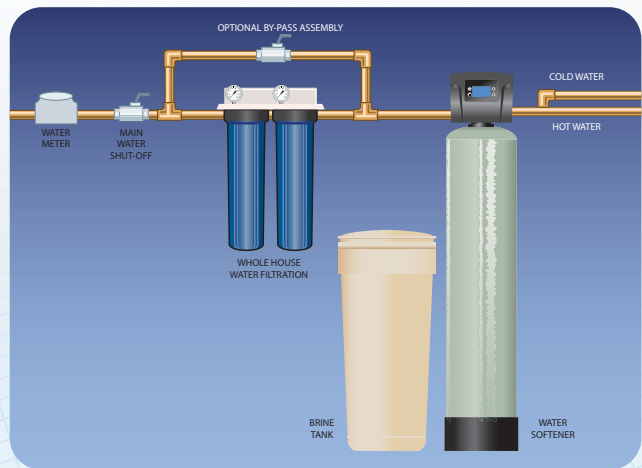

#### Dual Stage Filtration:

**Filter # 1 - Polypropylene 5 Micron Melt Blown (PPMB) Sediment Filter**  
Cartridge Item #36287

Thermally bonded polypropylene microfibers for higher filtration efficiency performance. The chemical resistant material is and not prone to bacterial attack and will not add any taste, color and odor to the water.

**Filter # 2 - Radial Flow (RF) Granular Activated Carbon**  
Cartridge Filter Item #36091

The perfect solution for effective reduction of chlorine, bad taste and odor. These filters provide low pressure drop and fewer carbon fines.

#### Replacement Cartridges:

Item #	Model #	Size	Micron	Capacity (Gallons)	Flow Rate (gpm)
36287	PPMB-5-20BV	4.5" x 20"	5	NA	20 gpm
36091	RF-20BV	4.5" x 20"	NA	70,000 gallon @ 4 gpm	6 gpm
